

## Slow Motion Film Maker

A lot of shows in the Big Imaginations Festival make you look at things in a whole new way, whether it's the scary neighbour in **Baba Yaga** or the silly stories of **Traditional Tales With A Twist**. By filming things in slow motion, you'll be able to have fun looking at things in a whole new way!

### What you will need:

- Things that float (like bubbles)
- Things that fall (like a ball)
- Things that pop (like balloons)
- Things that fly (like a paper plane)

### Method:

- Go to the camera on a smart phone and slide to the "slow motion" setting.
- Make your own slow motion film
- Share with us using #BigImaginations

### Top tip!

- If you want to edit the slow motion, just hit the "edit" button.
- Keep your camera moving while you film - it makes things more exciting!
