

Stop Motion Film Maker

With stop motion, you get to make things look like they're moving and play around with how you perceive things, just like in the Big Imaginations shows **iPet** and **Mini**. Have a play and make the world move differently!

What you will need:

- Tablet/iPhone/iPad
- The "Stop Motion" app

Method:

- Download the Slow Motion app from your app store.
- Start taking photos for the animation
- Share your story using the hashtag #BigImaginations

Top tip!

- Prop your phone against something to keep it still.
- Try and use static props or a tripod!
